More Than \$2 Billion Worth of Mortgages Saved in the 12 Months Ending March 2009

Genworth Financial helped prevent more than \$2 billion in mortgages from going into foreclosure in the 12 months ending March 31, 2009. Working with lenders and loan servicers, Genworth completed more than 15,000 successful mortgage workouts throughout all 50 states during the period. The families helped were mostly concentrated in Florida (\$218 million), Texas (\$150 million) and Georgia (\$111 million).

The impact of foreclosure reaches beyond the loss of the borrower's home, often deeply affecting local communities and real estate markets. One estimate by Fannie Mae concludes that a single foreclosure can lower neighboring home values by as much as nine percent. There is a cost to local governments too. Foreclosures mean lower tax revenues, and more administrative resources that municipalities must put towards managing the foreclosure process.

As Genworth gears up to support the Administration's new modification plan, it looks forward to the opportunity to further reduce foreclosures and keep more homeowners in their homes. The quarterly Foreclosure Prevention Scorecard provides a representative snapshot of mortgage workout trends by analyzing data from Genworth's Homeowner Assistance program.

Key findings for the Q1 09 Scorecard:

- Each mortgage workout amounted to savings, on average, of \$138,000.
- Nearly 90 percent of the troubled homeowners helped by Genworth across the nation were able to keep their homes.
- Nationally, the number of workouts in the first quarter of 2009 rose 56 percent over the same period the previous year.
